Concrete Facade Project begins Monday, May 20

Dear Residents,

Our concrete facade project will begin on Monday, May 20. Scaffolding will be installed on the building to prepare for the first two drops which will be on the east side of the building and will affect portions of the C, F and H units. Concrete work and associated noises will begin on Tuesday, May 21. The contractors will start work on the 10th floor and work their way up the building.

As work progresses, I will provide updated schedules on how quickly we estimate the crew will move up the building and to subsequent drops.

As we recommended in earlier correspondence, it's suggested that (if possible) you keep your windows closed and HVAC units off while the contractors are in close vicinity of your unit. You might also consider drawing your shades for privacy during the work hours.

We will keep you updated as the project progresses. Please feel free to contact the management office if you have any questions.
