Re: Concrete Façade Project Resumes Monday, March 9

The concrete façade project will resume next week. This project includes exterior concrete repair, sealant replacement, and localized concrete painting.

This work will be noisy. We advise you consider the following during the project:

- ***Close windows and drapes for privacy during work hours (Mon-Fri, 8am-4pm)***
- ***Do not use A/C units during work hours (Mon-Fri, 8am-4pm) when work is in close proximity to your unit. It's further recommended you cover your HVAC unit vents to minimize dust from entering your unit.***
- ***Remove items from walls/shelves that may fall from vibration***

The construction team will work as quickly and efficiently as possible. We appreciate your patience and cooperation throughout construction. Contact the management office at 312-649-9600 if you have any questions.

Thank you.
